Education

Lumbini I.C.T. Campus (Tribhuvan University) — Nawalparasi, Nepal
Bachelor of Computer Application (BCA) — *2080 B.S. – Present*

Gaindakot Namuna Secondary School — Nawalparasi, Nepal
Higher Secondary, Management (Class 11 & 12) — *2079 – 2080 B.S. | GPA: 2.79*

Technical Skills

Languages: C, C#, Java, Python, Dart, GO, PHP, JavaScript, HTML, CSS
Frameworks/Libraries: Laravel, Flutter, Bootstrap, ADO.NET
Databases: MySQL
Tools & Platforms: Git, GitHub, VS Code, XAMPP, Figma, Adobe XD, Canva
Concepts: Data Structures & Algorithms, OOP, Payment Gateway Integration (eSewa, Khalti), Responsive/Accessible Web Design

Experience

HackerRank Orchestrate AI Agent Hackathon | *Independent Participant* — May 2026

- Designed and built a multi-domain AI support-triage agent in Python that automatically classified and routed support tickets across HackerRank, Anthropic/Claude, and Visa domains.
- Implemented prompt-based routing logic and structured output parsing to reduce manual ticket triage, submitting a fully working agent within the competition timeline.

Workshops & Achievements

Global Cybersecurity Community Forum – Certificate of Participation — 2026
Completed a three-day workshop on cybersecurity in collaboration with Cisco, covering Cisco Networking, AWS Cloud, and cybersecurity practices.

LICT UI/UX Design Competition – Certificate of Participation — 2082 B.S.
Participated in the UI/UX Design Competition organized by Lumbini ICT Campus.

Projects

Docster – VS Code Documentation Extension | *TypeScript, VS Code Extension API, Node.js*

- Built a VS Code extension that helps developers add doc comments, generate project documentation, and catch missing comments directly in the editor.
- Implemented a rule-based engine using templates and static analysis to generate doc comments for JavaScript and TypeScript functions, with a quick-fix action that inserts them in one click.
- Added a command that exports generated documentation to a `DOCS.md` file.

RedTrack – Blood Bank & Donor Management System | *PHP, MySQL, JavaScript, Khalti/eSewa API*

- Developed a full-stack blood bank management system for donor registration, blood inventory tracking, and hospital blood requests.
- Integrated Khalti and eSewa payment gateways along with a transport-partner selection module for blood delivery coordination.
- Implemented role-based authentication with separate admin and hospital dashboards to manage requests, inventory, and dispatch operations.

Urban Pulse – Food Ordering System | *HTML, CSS, JavaScript, PHP, MySQL*

- Developed a food ordering platform with menu browsing, cart management, and online ordering.
- Implemented user authentication, session-based carts, and order tracking.
- Designed a PHP backend with a normalized MySQL database for menus, carts, and orders.
