HackerRank | LeetCode | Gaindakot-04, Nawalparasi (East of Bardaghat Susta), Nepal

Summary

Computer Application undergraduate with hands-on experience building full-stack web applications using PHP, MySQL, JavaScript, and Python. Skilled in designing relational databases, implementing authentication and session management, and integrating third-party payment APIs (Khalti, eSewa). Strong foundation in data structures, algorithms, and object-oriented programming, validated by multiple HackerRank certifications. Seeking a Software Engineering / Full-Stack Developer role to apply and grow technical skills in a fast-paced, engineering-driven environment.

Education

Lumbini I.C.T. Campus (Tribhuvan University) <i>Bachelor of Computer Application (BCA)</i>	Nawalparasi, Nepal 2080 B.S. – Present
Gaindakot Namuna Secondary School <i>Management (+2)</i>	Nawalparasi, Nepal 2079 B.S. – 2080 B.S.
Gaindakot Namuna Ma. Vi. <i>SEE (Grade 10)</i>	Nawalparasi, Nepal 2065 B.S. – 2078 B.S.

Technical Skills

Programming Languages: C, Java, Python, C#, Dart, HTML, CSS, PHP, JavaScript
Libraries / Frameworks: Flutter, Bootstrap
Tools & Platforms: Git, GitHub, VS Code, XAMPP, Figma, Adobe XD, Canva
Databases: MySQL
Core Concepts: Data Structures & Algorithms, OOP, RESTful principles, Session Management, Relational Database Design

Projects

Food Ordering System <i>HTML, CSS, JavaScript, PHP, MySQL</i> - Built a full-stack web application enabling users to browse menus, manage a cart, and place orders online end-to-end. - Implemented secure user authentication and session-based cart management to persist state across the ordering flow. - Designed backend order-processing logic and a normalized MySQL schema to handle menu items, carts, and orders.	GitHub
RedTrack – Blood Bank & Donor Management System <i>HTML, CSS, JavaScript, PHP, MySQL</i> - Developed a full-stack platform for donor registration, blood inventory tracking, and hospital transaction management. - Built dedicated admin and hospital portals with role-based access to streamline blood request and dispatch workflows. - Integrated Khalti and eSewa payment gateways and a transport-partner selection module for logistics coordination.	GitHub
ConfessHub – Anonymous Confession Platform <i>PHP, MySQL, Bootstrap, JavaScript</i> - Built a full-stack platform allowing users to anonymously post confessions with like and comment functionality. - Implemented secure user authentication and an admin dashboard for content moderation and user management. - Designed a responsive UI with Bootstrap and structured a MySQL database to support real-time interactions.	GitHub

Certifications

Python (Basic) – HackerRank
C# (Basic) – HackerRank
SQL (Basic) – HackerRank
SQL (Intermediate) – HackerRank
Go (Basic) – HackerRank
