PROJECTS / OPEN-SOURCE

FOOD ORDERING SYSTEM | [LINK](#)

HTML, CSS, JS, PHP, MySQL

A full-stack web application that enables users to browse menus, manage a cart, and place orders online. Built with user authentication, session-based cart management, and order processing demonstrating end-to-end implementation of core web development concepts including frontend UI, backend logic, and database integration.

REDTRACK | [LINK](#)

HTML, JS, CSS, PHP, MySQL

A full-stack blood bank and donor management system with donor registration, blood inventory tracking, hospital transaction management, transport partner selection, and integrated Khalti/eSewa payments. Features dedicated admin and hospital portals.

CONFESSHUB | [LINK](#)

PHP, MySQL, Bootstrap, JavaScript

A full-stack anonymous confession platform where users can share confessions, like and comment on posts, and interact in a secure, responsive environment. Built with user authentication, an admin dashboard, and database integration, demonstrating end-to-end frontend and backend development.
